Speaker Volume Controllers

Volume controllers are useful in public address systems. Even if the volume of the speaker is changed, the impedance of the circuit is kept constant. Further, they are designed to make a remote controlled emergency announcement possible regardless of the setting position of the controller.

WZ-598N is used for mounting WZ-550N series volume controllers.
This is a surface-mounted type housing for a volume controller which can be mounted on walls, partitions, etc.
